Office Action Summary	Application No. 10/815,400	Applicant(s) ELDRIDGE ET AL.	
	Examiner Ernest F. Karlsen	Art Unit 2829	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2829

Claims 46-55 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is nothing in the original disclosure to support the phrase "approximately 645 degrees" of claim 46, line 9. Also there is no original disclosure to support "630 degrees" in claim 50 or "615 degrees" in claim 51.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 46-57 are rejected under 35 U.S.C. 102(b) as being anticipated by Kwon.

The claims are drawn to a semiconductor device that has been tested by a specific process. In other words the claims are product by process claims. There is no disclosure that the tested devices are changed in any way by the testing process. It is presumed that the semiconductor devices are the same before and after testing. Any semiconductor structure that includes a wafer composed of semiconductor devices with electrical contact terminals is considered to meet the limitations of claims 46 –57. How the semiconductor devices are tested is irrelevant to the structure of the semiconductor devices. Kwon shows a wafer having integrated circuits 15 which have electrical contacts 19.

Art Unit: 2829

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Luthi et al, Ko, Mizuta and Roggel all show probes of the kind used in Applicants' process wherein the probe has a blade with a specific orientation (approximately parallel) to the direction that the probe wipes.
